

Nedap **CowControl**

# Nedap Now

More insights  
Better decisions  
Improved results

**Nedap Now combines the accuracy and reliability of Nedap CowControl with the processing power and scalability of cloud computing. It unlocks new possibilities in cow and herd management:**

## Benefits at a glance

- ✓ Always accessible and reliable system with online and offline functionality.
- ✓ Advanced interfacing opportunities with management software and other stakeholders.
- ✓ More available (historical) data over longer periods of time.
- ✓ Tailor-made work lists per staff member to focus on the desired results.
- ✓ Differentiation in access rights per employee or for third parties.
- ✓ Better analyses by combining data from multiple locations in one overview.
- ✓ Identification of anoestrus cows or potential abortions to minimize non-productive days.

“Thanks to Nedap Now we know very easily that we are hitting our targets based on the KPI’s we set. That’s also because the system always works. Even if the internet goes down. Actually, we would have been lost without Nedap.”
